

a Prescribed deficit (ground truth)

b Estimator error (DeepStrain)

Radial SDs overlap, so no ranking of cases is implied. Errors are case-level means over whole slices, not errors inside the scar region.
Also reported: Dice 0.82; displacement error 1.0 ± 0.9 mm.

c Abnormality attributes in this experiment

Magnitude

Ecc close to ground truth;
Err under-estimated

Location

myocardial Dice only;
no lesion-centroid error

Extent

one fixed scar geometry;
extent recovery not measured

Timing

peak-time error not
in the record read

✓ held ✗ lost or biased ○ not reported ⦶ not inspected
