

## a Prescribed deficit (ground truth)

## b Estimator error (DeepStrain)

No between-case test was reported, so no case ordering is implied. Errors are case-level means over whole slices; scar-region errors were not reported. Also reported: Dice 0.82; displacement error  $1.0 \pm 0.9$  mm.

## c Abnormality attributes in this experiment

### Magnitude

scar-level error not reported;  
slice means: Ecc error small,  
Err under-estimated

### Location

myocardial Dice only;  
no lesion-centroid error

### Extent

one fixed scar geometry;  
extent recovery not measured

### Timing

peak-time error not  
in the record read

○ not reported at the attribute's own (scar) level

⊙ not inspected in the record read
