a Cine lacks a material label

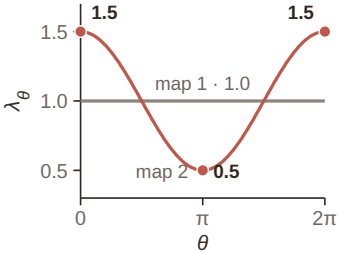

Cine supplies boundaries and weak texture only; correspondence inside the wall must be inferred.

b Same masks, two material maps

Same eight material points in both annuli.

c Stretch differs by ±50%

$\lambda_\theta = 1 + a \cos\theta$

range, map 2	**0.5–1.5**
mean over θ, both maps	**1.0**
orientation preserved for	**|a| < 1**
