

a Prescribed scar: radial strain 0.95 → 0.30

b Slice-mean error: Ecc small, Err biased low

myocardial Dice, all phases	0.82
displacement error	1.0 ± 0.9 mm
EF, NOR / DCM / HCM / infarct	51 / 34 / 41 / 49%

Case-level means over whole slices; errors inside the scar were not reported.
No between-case test was reported, so no case ordering is implied.

c No abnormality attribute was reported at the scar's own level
